

Code of Practice for Cyber Security and Safety in Engineering

The Institution of Engineering and Technology has published a Code of Practice with the support of the NCSC.

A Code of Practice to help the engineering sector implement effective cyber security has been published today.

The Code, developed by the Institution of Engineering and Technology with input from the NCSC, sets out a series of principles designed to ensure safety and cyber security teams work together effectively to address the threat of cyber attacks.

More details can be found via the [Institution of Engineering and Technology website where the Code itself can be found](#).
